

WELCOME

It is the role of Caringhands Home Health Care to make your health conditions and lifestyle manageable. In helping you recover an injury or assisting you with daily living activities, we put our full on commitment. You have your whole life in your command - we will support you every step of the way.

Our care programs are designed to balance the support services and the level of independence you want to keep. Unlike nursing homes, hospitals or institutionalized care facilities, our services enable you to stay at home which is a far more affordable alternative. By having the option of home health care services, you can shorten your hospital stays, cut down expenses of travelling from home to hospital and back, enjoy the comfort of your own residence and most of all - spend more time with your family. Their support is essential to your speedy recovery, stabilized health and emotional wellness.

With recommendations from your physician, we provide home health care services through experts such as nurses, therapists, social workers, home health aides and nursing assistants. We maintain a strong network of health care practitioners to ensure that anytime you will need health support services from Caringhands Home Health Care, we are readily available.

ABOUT US

Caring for you at home involves a high degree of quality consciousness. Unlike other industries, Home Health Care successes are largely dependent on how patients respond to care services and treatment plans laid out by the physician and/or case manager. Even more, it differs from one patient to another. Thus, there is a need to customize care plans for every single patient and home that we serve. In delivering our home health care services, we abide by our company mission, vision and core values.

Mission

To be committed care providers in your home and become well known for quality service and expert care professionals - both in words and in deeds.

Vision

We envision comfortable home conditions for all our clients while managing their health, disability, elderly lifestyle and activities of daily living.

SERVICES

Having professional caregivers, nurses and therapists in your home is a very big advantage on your part. By receiving the appropriate medical attention or home support services, your health risks are diminished. These trained professionals can answer to your care requirements while preventing further injury or health complications.

We provide assistance with daily living activities such as:

- Bathing
- Dressing and Grooming
- Preparing Meals
- Meal Planning (diet based on physician's recommendation)
- Feeding
- Mobility
- Making the Bed and Changing the Sheets
- Housekeeping
- Laundry

Caringhands Home Health Care also offers formal/skilled care services such as:

- Skilled Nursing
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Medical Social Services

EMPLOYEES-IN-SERVICE

Medical training is necessary but equally as important is the dedication to be a care provider. This cannot be achieved through training.

At Caringhands Home Health Care, we thoroughly screen our applicants for their credentials and their commitment to the profession. The health care industry is a highly demanding sector of society. Without it, many private individuals and families will have a hard time going through daily living. We know our role and we take it seriously.

The staff that shares this commitment with us includes:

- Nurses
- Occupational Therapists
- Speech Therapists
- Physical Therapists
- Medical Social Workers
- Case Mangers

With full back-up from the management, we apply state-approved care methods and exceed quality standards by a mile.
